

Sustainability Policy

At **Hotel Grand Central**, we are dedicated to promoting sustainability in every aspect of our operations. We recognize our responsibility to minimize our environmental impact while providing exceptional service to our guests. Our sustainability initiatives are focused on reducing our carbon footprint, conserving resources, and contributing to the well-being of our community.

Sustainability Commitment

Hotel Grand Central strives to integrate sustainability into our business practices, offering guests a sustainable and eco-friendly experience. Our efforts are guided by the following principles:

- 1. Resource Conservation**

We are committed to reducing energy and water consumption throughout our hotel. We utilize energy-efficient technologies, implement water-saving practices, and continually monitor usage to identify opportunities for improvement.

- 2. Sustainable Procurement**

We seek to source products and services in a manner that minimizes environmental impact. This includes purchasing eco-friendly products, supporting local businesses, and selecting vendors who share our commitment to sustainability. Whenever possible, we prioritize products that are recyclable, biodegradable, or made from renewable resources. We also strive to source and use sustainable materials in furnishings, prioritising durable, responsibly sourced, and environmentally friendly materials wherever feasible.

- 3. Waste Reduction and Recycling**

We actively work to minimize waste generation across all hotel operations. Through responsible waste management, including recycling programs, we aim to reduce our environmental footprint. We encourage guests and staff to participate in our recycling initiatives and provide clear guidelines for proper disposal.

- 4. Supporting Local Communities**

We believe in giving back to the community and support local initiatives that promote sustainability. We work with local suppliers, businesses, and organizations that share our values and strive to create a positive social impact in Singapore.

5. **Guest Engagement and Education**

We encourage our guests to join us in our sustainability efforts by providing information and options for reducing their environmental footprint during their stay. This includes encouraging guests to conserve energy, reduce water usage, and participate in our waste management and recycling efforts.

6. **Continuous Improvement**

We are committed to regularly evaluating and improving our sustainability practices. By staying informed about the latest sustainable technologies and best practices, we continuously refine our operations to achieve our environmental goals.

Our Vision

At **Hotel Grand Central**, sustainability is an ongoing journey. By adopting responsible practices, we aim to create a lasting positive impact on the environment, our community, and the future of tourism. We invite our guests to be part of this journey and work together with us to protect and preserve the world around us.
